Project Overview

The Klodo Garments Store Data Analysis project aims to provide valuable insights into the store's performance, sales trends, and customer demographics. By utilizing Excel's data analysis and visualization capabilities, this project transforms raw data into meaningful information. The dataset consists of various columns, including order details, customer information, sales figures, and product-related information.

KPI's

Compare the sales and orders using single chart

Which month got the highest sales and orders?

Who purchased more – Men or Women?

What are different order status in 2022?

List top 10 states contributing to the sales?

Highest selling category?

Which Channel is contributing maximum to the sales?

Relation between age and gender based on number of orders.

Processes

- Verify data for any missing values and anomalies, and sort out the same.
- Made sure data is consistent and clean with respect to data type, data format and values used.
- Created pivot tables according to the questions asked
- Merge all pivot tables into one dashboard and apply slicer to make dashboard interactive (clickable) and dynamic.

Project Insights

- **Women customers are more likely to buy products compared to men (~65%).**

- **The states of Maharashtra, Karnataka and Uttar Pradesh are the top 3 product buyers**

- **The adult age group (30-49 yrs) is max contributing (~50%) and buys the most products.**

- **The maximum number of products customer orders from Amazon, Flipkart and Myntra channels.**

Conclusion

To improve sales of **Klodo Garments Store**, **women customers** of the age group **(30-49 yrs)** living in **Maharashtra, Karnataka** and **Uttar Pradesh** must be targeted by showing ads/offers/coupons available on Amazon, Flipkart and Myntra.
